SHARP Health Plan

Men (18 years and older)[1]

Preventive Care Checklist

The following preventive care checklist is not a complete list of guidelines. Please consult your doctor to develop your own personalized preventive care plan. Your doctor will help you determine which tests and health screenings are best for you based on your age, gender, health status and family history.

[1] The information in these checklists includes recommendations adapted from the following sources as of September 2025 and is subject to change: Preventive services with a rating of A or B from the U.S. Preventive Services Task Force; immunization for children, adolescents and adults recommended by the Centers for Disease Control and Prevention; and preventive care screenings for infants, children, adolescents and women supported by the Health Resources and Services Administration.

[2] Based on risk factors, and as advised by your doctor.

[3] One-time screening in men who have ever smoked.

[4] You are eligible for the series and booster: all who are 65 years and older, all who are younger than 65 with risk factors, all who are in close contact with others with risk factors and all who choose protection.

[5] For more information about vaccine schedules, please visit **cdc.gov/vaccines**.
